Dear <<First Name>>,

Welcome to the latest TB Modelling and Analysis Consortium (TB MAC) newsletter, with information for TB modellers, epidemiologists, and decision-makers. This newsletter contains details on an upcoming discussion group on *What does Artificial Intelligence mean for TB transmission modelling?*

To build on our successful TB Modelling and Analysis seminar series, we have set up a small number of "online topic-focused modelling discussion groups". The aim of these groups is to bring the community together around TB modelling topics of mutual interest to share knowledge and expertise.

The groups are open to all modellers and those interested in modelling, from early career researchers who might appreciate being able to discuss current issues they have in their modelling and the opportunity to make links to other modellers, to more senior modellers who might like to pitch an idea and get friendly input.

As the groups continue to grow, we would like to invite you to join us for an informal discussion group on *What does Artificial Intelligence mean for TB transmission modelling?* on Thursday, 2 May at 1400 BST.

Please email Tomos Prys-Jones (tomos.prys-jones@lshtm.ac.uk) and Richard White (richard.white@lshtm.ac.uk) if you are planning to join this discussion.

The Zoom link is here.

For more information on TB MAC, or to get involved, please contact any of the TB MAC Committee, visit www.tb-mac.org or email us directly at tb-mac@lshtm.ac.uk.

Best wishes,
Richard, Finn, Christina and the TB MAC Committee
